Automatic Espresso Equipment

Franke

Evolution

The moderately sized Evolution is an elite performer.

The entry-level model alone has everything you need.

There is almost nothing its sophisticated technology cannot handle. Its elegance is the delight of catering professionals, which is why the Evolution has so many admirers throughout the industry, in restaurants, bars, hotels, large canteens and the vending sector. In short, it's a coffee machine with character.

Customized product labelling

Up to 20 individually programmable coffee products

Automatic cleaning and rinsing programming

Franke milk system

ESPRESSO EQUIPMENT

Simonelli

Aurelia

The Nuova Simonelli Aurelia is an engineering marvel and is the only espresso machine designed using computed theoretical models to achieve temperature stability. In order to achieve its high level of temperature stability, every aspect of the machine had to be perfectly balanced and engineered to exacting standards. The result is an amazing and truly remarkable system that self-stabilizes using its own water and a single heat source to maintain thermal equilibrium. The Aurelia's scientifically designed brew group weighs over 12 pounds and is a key factor in the machine's temperature stability. It allows the operator to customize the degree of pre-infusion, brew temperature, and flow rate individually.

Appia

Innovations built in the Appia unit make it state of the art: from the new infusion system, to the innovative hydraulics, till the advanced thermal compensation system. Designed to respond to any counter space needs, Appia is the perfect solution for the customer that does not accept compromises and looks for high performance in a compact reliable product

La Marzocco

Linea

Comes standard with :

Dual Boiler System

Separate boilers optimize espresso brewing and steam production.

Saturated Groups

Ensure unsurpassed thermal stability, shot after shot.
